

Using tilting trains with ClearRoute™2

Certification training

Omnicom
Balfour Beatty

Using tilting trains with ClearRoute™ 2 is an essential course for all users of the tilting trains module in ClearRoute™ 2.

Using tilting trains with ClearRoute™ 2 certification provides an understanding of how tilting trains behave differently from conventional trains and how this should be taken into account when gauging.

Course overview

The one-day course is delivered using a mix of explanations and demonstrations combined with a series of exercises ensuring that delegates gain plenty of hands-on experience.

Each delegate will undertake a formal assessment. Upon completion they will be presented with a certificate to confirm their competence along with a CLP file to install in ClearRoute™ 2.

Delegates are provided with comprehensive course notes to take away for future reference.

A maximum class size of four for our ClearRoute™ 2 certification courses ensures that each delegate receives a high level of support from the tutor and has access to the appropriate equipment.

What you will learn

- Brief history of UK tilting trains
- Reasons for tilting trains
- Operational models including active, passive and failed
- Compensating for tilt lead and lag
- Use of current tilting train vehicle models in ClearRoute™ 2 - Virgin Pendolino (Class 390) and Virgin Super Voyager (Class 221)
- Tilting train operation including Tilt Authorisation and Speed Supervision
